

Piranha Composite Gate

What is included?

- Gate
- Hinge set (including top & bottom hinges, bolts, washers & nuts)
- Handle set (including 2 handles, covers & screws)
- Lock set (including lock, keys, bolts & keep plate)

Please note: Fence Posts are not included in the gate kit

Gate dimensions:

- 184cm tall
- 100cm wide
- 3.5cm deep

Tools Required:

- Drill
- Screwdriver
- Spirit level
- Spanner (for Bolt Down Fence Post)

How to install your Piranha Gate

1. Set the hinge post up first and measure the distance between posts
2. Once in place, fix the bottom hinge, ensuring the holes are piloted (please use the larger hinge for the top and smaller hinge for the bottom of the gate)
3. *When fixing posts, make sure all posts are plumb and level*
4. Attach the gate to the bottom hinge
5. Drop the top hinge onto the gate and mark holes in the post
6. Pilot holes and attach using fixings supplied
7. Check that your gate is fixed securely and swings with ease
8. Trim the Post Cap to fit over the bolts and attach to the fence post
9. Fix the lock and handle into the gate, ensuring all holes are pre-drilled
10. Fix the lock side fence post, which will hold the keep, ensuring the lock will engage properly
11. Line up the keep plate with the lock and fix into the post, pre-drilling holes
12. Insert the lock barrel into place and secure with screw provided
13. Insert your keys and make sure the locking system works smoothly, on both sides
14. Check your gate and ensure it works efficiently
