Piranha Traditional Fencing is fully capped and available in 3 colours, which are dual sided.

Traditional Fencing Designs

Traditional Fencing Components

TRADITIONAL FENCE BOARD
1760mm (W) X 150mm (Finished Height)

IN GROUND POST
2.40m (L)

BOLT DOWN POST & FIXING BOLTS
1.90m (L)

POST CAP

POST SKIRT

TOP & BOTTOM TRIM KIT

DIAGONAL TRELLIS

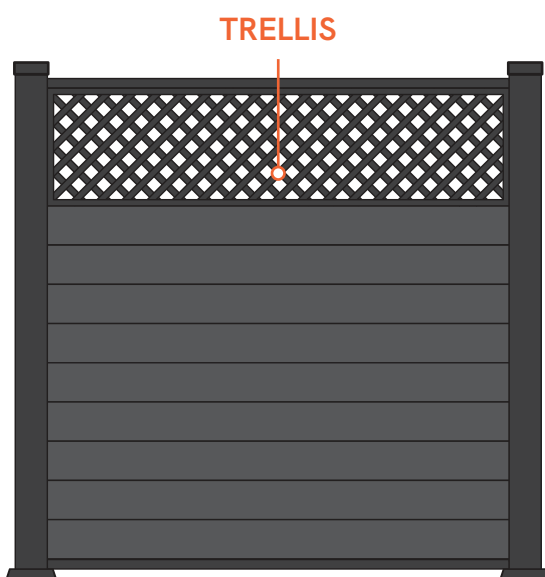

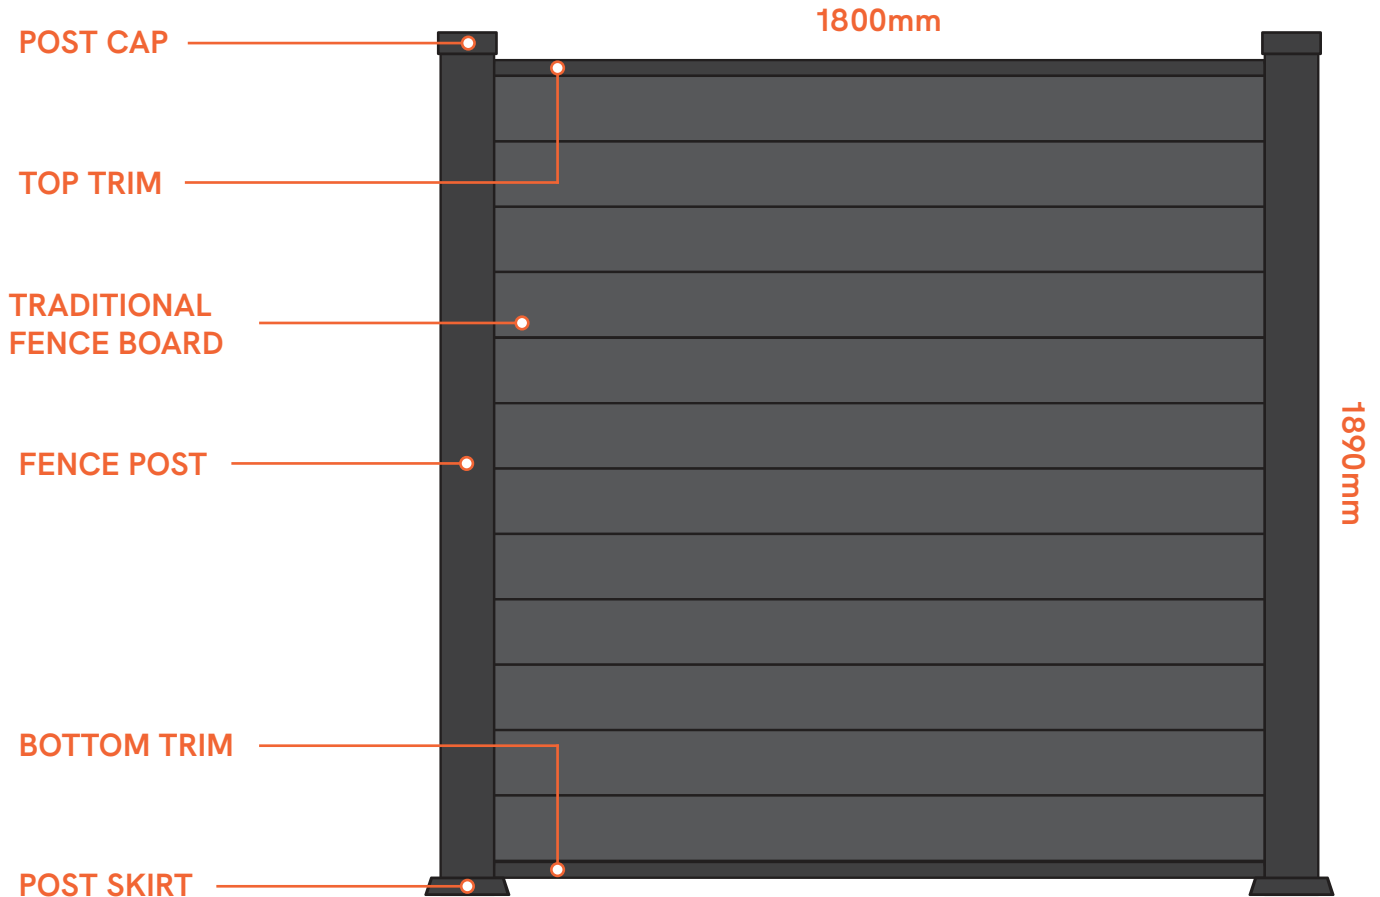

HORIZONTAL TRELLIS

DECORATIVE ALUMINIUM SLATS

Component Assembly

The standard fence section for a 1890mm finished height, will have 12 Boards.

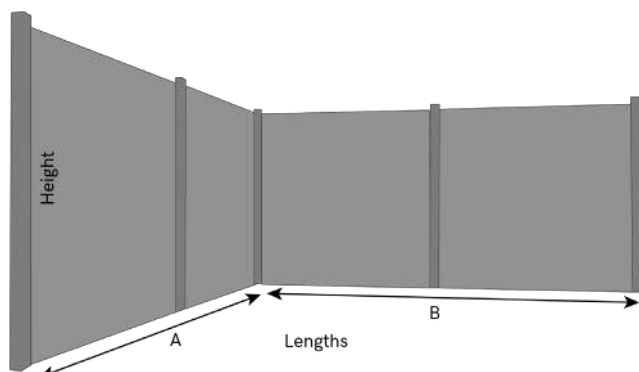

This configuration, based on standard measurements of 1800mm (W) x 1890mm (H), will have 9 Traditional Fence Boards and 1 Trellis.

This configuration, based on standard measurements of 1800mm (W) x 1890mm (H), will have 11 Traditional Fence Boards and 3 Decorative Aluminium Slats (1 Kit).

Calculating my Requirements

Standard Traditional Fence Kit

Measure the individual section lengths that you require to cover in metres, divide by 1.8m and round up. Add these together to give you the number of Traditional Fence Kits required. You will also need 1 additional Traditional Finishing Post Kit at the end of the fence run.

Example: Length A = 3.3m and Length B = 5m
 3.3m divide by 1.8m = 2 Traditional Fence Kits
 5m divide by 1.8m = 3 Traditional Fence Kits

Total required is 5 Traditional Fence Kits plus 1 additional Post Kit

Please note: Some panels will need to be cut to the required size. Boards can be cut to reduced centres below 1.80m, using a fine TPI (tooth per inch) wood blade on a chop saw. The Top & Bottom Trim can be cut to size. Simply slide the bracket along, trim to the required size, pilot the holes and fix.

If your design is sloped, it is recommended that you add at least 5% to the total Traditional Fence Boards required, to allow for wastage.

Bespoke Traditional Fence

To determine how many Traditional Fence Boards you will require, divide the length of the area by 1800mm. This is the measurement between post centres.

A single Traditional Fence Board has a finished height of 150mm once the boards have been stacked on top of each other horizontally.

Divide the required height by 150mm to establish the number of boards that you will require for your respective height.

Height Examples:

1800mm (6 Feet)	—	12 Boards
1500mm (5 Feet)	—	10 Boards
1200mm (4 Feet)	—	8 Boards
900mm (3 Feet)	—	6 Boards

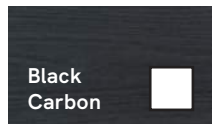

Traditional Fencing Kits

Pre-Prepared Foundation Kit

Comprising of:

- Bolt Down Traditional Fence Post Kit - 1.9m
(Fence Post, Post Cap, 4 x Fixing Bolts, Post Skirt)
- 12 Traditional Fence Boards
- Top & Bottom Trim Kit
(Top & bottom trim, 4 brackets, 8 screws, driver bit)

Select Colour:

Kit
Quantity:

Bolt Down Finishing Post Kit - 1.90m
(Includes Fence Post, Post Cap, 4 x Fixing Bolts, Post Skirt)
Always required to finish the fence.

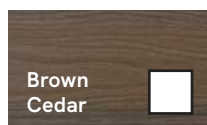

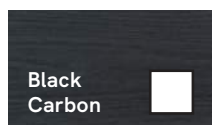

Post Kit
Quantity:

Fixing into Ground Kit

Comprising of:

- In Ground Traditional Fence Post Kit - 2.40m
(Fence Post, Post Cap)
- 12 Traditional Fence Boards
- Top & Bottom Trim Kit
(Top & bottom trim, 4 brackets, 8 screws, driver bit)

Select Colour:

Kit
Quantity:

In Ground Finishing Post Kit - 2.40m
(Fence Post, Post Cap)
Always required to finish the fence.

Post Kit
Quantity:

Create Your Own Kit

Select a component from each section below to create your own kit.

A) Post Kit

Post Kit for Pre-Prepared Foundation

Bolt Down Traditional Fencing Post Kit - 1.90m
(Fence Post, Post Cap, 4 x Fixing bolts, Post Skirt)

Quantity:

Post Kit for Fixing into Ground

In Ground Fence Post Kit - 2.40m
(Fence Post, Post Cap)

Quantity:

IMPORTANT: Remember to order an additional Post Kit for finishing.

B) Traditional Fence Boards

Height Examples:

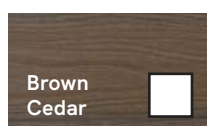

1.80m / 6ft = 12 boards

1.50m / 5ft = 10 boards

1.20m / 4ft = 8 boards

Traditional Fence Boards are supplied in packs of 3. Divide the number of boards required by 3 and round to the nearest pack.

Select Colour:

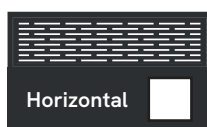

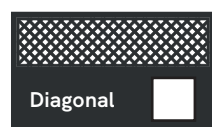

No. of
Boards:

Pack
Quantity:

C) Optional Extras

If selecting a Trellis or Decorative Aluminium Slats, remember to remove some of your boards.

Optional: Trellis (1 Trellis = 3 Boards)

Quantity:

Optional: Decorative Aluminium Slats - Pack of 3 (3 Deco Slats = 1 Board)

Pack
Quantity:

D) Top & Bottom Trim Kit

1 Trim Kit required per panel
(Top & Bottom Trim, driver bit, 4 brackets, 8 screws)

Quantity:

Accessories & Spares

ANTIQUE GREY TRADITIONAL FENCING WITH DIAGONAL TRELLIS

General Information

Colour Stabilisation

All our Piranha products contain UV stabilisers, however, due to their high natural content, all composite landscaping products will go through an initial colour stabilisation. Piranha Fencing provides increased protection against fading & weathering, providing the boards with an extra long life, due to its HDPE capping.

Colour Banding

Variation is designed into the shade spectrum using colour mixing, but some packs may have a more predominant shade to the next. Bear this in mind and inspect each pack to see if you need to consider mixing to create a natural blend.

Orders bought at different times will exhibit shade difference.

Even products purchased at the same time but then split into two separate projects at different times will stabilise at different rates. For example, if an area is installed and then extended some time later, even with the same consignment of product, there will be variation exhibited.

Maintenance & Care

Piranha composite products are low maintenance, however with a little care you can help keep your fencing looking good for many years.

We recommend cleaning your fencing every 3-6 months.

General Cleaning - Apply warm soapy water to the surface of the boards and clean with a soft bristled brush.

Deep Cleaning - Use Pavetuf Composite Cleaner which is specifically designed for the removal of built up surface dirt. It is biodegradable and is a non-acidic, non-caustic formula. Alternatively use a jet wash with no greater than 1500 PSI to clean the surface of your fencing. Have the jet wash on a fan setting and hold 300mm from the surface. Regardless of which cleaning method you choose, always clean along the length of the boards to prevent any accumulation of debris that can interfere with water drainage.

Stubborn Spot Stains - For stubborn stains, such as oil and grease marks, we recommend that you use the techniques outlined above as well as the advice below: Treat the affected area within the first 7 days. Pavetuf Deep Cleaner can be used, as it contains a degreasing agent which assists in the removal of heavy soiling such as oil and grease stains from the surface of hard landscaping products, including composite fencing boards.

Surface Mildew and Mould Growth - Piranha fencing boards are resistant to the damaging effects of both mould and mildew growth, this type of growth can occur on almost every outdoor surface and may collect on the surface of the product. General routine cleaning will help avoid excessive build-up of such growth. Pavetuf Green-Off Cleaner can be use if there is a build-up of organic growth. It is a fast acting cleaner specifically designed for the treatment of organic growth.

Water Stains - Use warm soapy water to thoroughly clean the affected boards. You may want to use a jet wash on the affected area to assist with the removal of surface residue. To further speed-up this process, use Pavetuf Composite Cleaner.

Painting & Staining - Piranha fencing is a fully capped composite product and therefore requires no painting or staining.

Pavetuf Composite Cleaner - A concentrated acid free cleaner for use on composite decking, cladding, fencing and doors.
